

BIODERMA Photoderm Aquafluide SPF50+

Very high daily sun protection with an ultra-light, dry-touch finish

SKINWISE QUICK TAGS

Sensitive Skin • Normal-to-Oily Skin • Combination Skin • Daily Sunscreen • SPF 50+

★ WHY SKINWISE SELECTED IT

A lightweight, water-based sunscreen offering **very high UVA + UVB protection** with a fresh, non-sticky, dry-touch finish.

Its **SUN ACTIVE DEFENSE™** technology combines UV filters with biological protection designed to reinforce the skin's natural defences against sun-related oxidative stress.

BEST FOR

- ✓ Sensitive skin
- ✓ Normal-to-oily skin
- ✓ Combination skin
- ✓ People who dislike heavy sunscreen
- ✓ Daily facial sunscreen
- ✓ Hot & humid weather
- ✓ People looking for a lightweight sunscreen
- ✓ Makeup users — can work as a makeup base

MAY NOT BE THE FIRST CHOICE FOR

- Very dry skin needing a richer sunscreen
- People specifically looking for a strongly mattifying acne-control sunscreen
- Anyone with sensitivity to a particular ingredient

SUN PROTECTION

SPF 50+

Very high UVB protection

UVA + UVB protection

Broad-spectrum daily photoprotection

SUN ACTIVE DEFENSE™

Bioderma's technology combines UV filters with biological protection aimed at helping protect against oxidative stress and support skin immune defences.

Water + heat resistant

PROS

- + Very high UVA/UVB protection
- + Very lightweight texture
- + Dry-touch finish
- + Non-sticky and non-oily
- + 8-hour hydration claim
- + Water and heat resistant
- + Fragrance-free
- + Non-comedogenic

- + Very good skin and eye tolerance
 - + Excellent everyday sunscreen option for sensitive skin
-

THINGS TO KNOW

- Not as strongly mattifying as dedicated oil-control sunscreens
 - Very dry skin may prefer a more moisturizing sunscreen
 - If your main concern is severe pigmentation/melasma, sunscreen selection should also consider visible-light protection and the overall pigmentation treatment plan.
-

HOW TO USE

Apply **generously and evenly to the face and neck every morning before sun exposure.**

Reapply during prolonged sun exposure and after sweating or other activities that may reduce protection. Bioderma specifically notes that using too little product reduces the level of sun protection.

DERMATOLOGIST'S PICK

Recommended for:

Sensitive → Normal → Combination → Normal-to-Oily skin

Especially when:

You want a **very lightweight, comfortable SPF 50+** that doesn't feel heavy or greasy.

Best feature:

 **High protection + ultra-light dry-touch texture**

Not the first choice when:

The patient specifically wants **maximum oil-control/mattifying performance.**

★ SKINWISE VERDICT

4.5 / 5

Best for:

Daily sunscreen users who want high protection without a heavy sunscreen feel.

SKINWISE CATEGORY

SUNSCREEN → LIGHTWEIGHT / SENSITIVE SKIN

ONE-LINE RECOMMENDATION

A lightweight SPF 50+ sunscreen offering very high UVA/UVB protection with a fresh, dry-touch finish—an excellent everyday choice for sensitive and combination-to-oily skin.
