

BIODERMA Photoderm Crème SPF 50+

Very High UVA/UVB Protection • Hydrating • Normal-to-Dry Skin

SKINWISE QUICK TAGS

Normal-to-Dry Dry Skin Sensitive Skin SPF 50+ Daily Sunscreen

★ WHY SKINWISE SELECTED IT

A **comfortable, moisturizing SPF 50+ cream** designed particularly for **normal-to-dry and sensitive skin**.

It combines high UVA/UVB protection with Bioderma's **SUN ACTIVE DEFENSE™**, which combines UV filters with biological protection intended to strengthen the skin's natural defence against sun-related stress.

BEST FOR

- ✓ Normal skin
- ✓ Normal-to-dry skin
- ✓ Dry skin
- ✓ Sensitive skin
- ✓ Skin that feels tight after sunscreen
- ✓ Daily facial sunscreen
- ✓ People who prefer a **cream rather than a fluid/matte sunscreen**

⚠ MAY NOT BE THE FIRST CHOICE FOR

- Very oily skin
 - Extremely shine-prone skin
 - People specifically looking for an ultra-matte sunscreen
 - People who prefer an ultra-light watery/fluid texture
-

SUN PROTECTION

SPF 50+

Very high UV protection

UVA + UVB

Broad-spectrum photoprotection

SUN ACTIVE DEFENSE™

Combination of UV filters and biological protection designed to support the skin's natural defence mechanisms.

KEY INGREDIENTS / TECHNOLOGIES

Glycerin

A humectant that helps attract and retain water, contributing to skin hydration.

Ectoin

A protective molecule included as part of the formulation's biological defence approach.

Vitamin E / Tocopherol

An antioxidant ingredient that helps protect against oxidative stress.

Laminaria Ochroleuca Extract

Brown algae extract included in Bioderma's formulation.

Silica

Helps with the sensory profile and contributes to a less greasy finish.

The current Bioderma formula also contains several modern UV filters, including **Diethylamino Hydroxybenzoyl Hexyl Benzoate, Bis-Ethylhexyloxyphenol Methoxyphenyl Triazine and Ethylhexyl Triazone**.

HYDRATION & TEXTURE

Texture: Cream

Finish: Invisible

Feel: Comfortable / moisturizing

Hydration: Up to 8 hours

Greasy: Designed not to leave an oily finish

Bioderma reports that **97% of users found the skin supple and comfortable**, while 89% reported that it did not make their skin greasy throughout the day.

 **Skinwise primary category**

SUNSCREEN → NORMAL / DRY / SENSITIVE SKIN

PROS

- + SPF 50+
 - + Very high UVA/UVB protection
 - + Excellent choice for dry skin
 - + Suitable for sensitive skin
 - + Up to 8-hour hydration claim
 - + Comfortable cream texture
 - + Invisible finish
 - + Designed not to leave a greasy film
 - + Can be used alone or under makeup
-

THINGS TO KNOW

- Not the best choice for very oily skin
 - Cream texture may feel richer than a fluid sunscreen
 - If someone wants a strong matte/oil-control effect, choose a dedicated oil-control sunscreen instead.
-

HOW TO USE

Apply **generously and evenly to the face and neck before sun exposure.**

Reapply regularly, particularly after **swimming, sweating or towel drying.** Bioderma recommends repeated application during sun exposure and notes that using too little reduces the level of protection.

DERMATOLOGIST'S PICK

Best suited for:

Normal → Normal-to-Dry → Dry → Sensitive skin

Especially when:

The patient wants high SPF protection but also needs a comfortable, moisturizing sunscreen.

Not my first choice when:

The main concern is excess oil, shine or a very matte finish.

SKINWISE VERDICT

4.5 / 5

Best feature:

💧 High protection + comfortable hydration for dry/sensitive skin

One-line recommendation:

A high-protection, comfortable SPF 50+ cream designed for normal-to-dry and sensitive skin, offering strong UVA/UVB protection with up to 8-hour hydration.

SKINWISE WEBSITE DISPLAY

I would show it to the customer like this:

BIODERMA Photoderm Crème SPF 50+

For: Normal • Dry • Sensitive Skin
