

IPCA ACNE-UV GOLD SPF 50 PA++++

Positioning: Advanced, lightweight sunscreen for **oily, acne-prone and combination skin**, with a strong broad-spectrum filter system and a comfortable finish.

SKINWISE QUICK TAGS

SPF 50+ • PA++++ • Acne-Prone • Oily/Combination • Lightweight • Fragrance-Free • Alcohol-Free

★ WHY SKINWISE SELECTED IT

This is a particularly good “**acne-prone skin sunscreen**” candidate for Skinwise.

The formula uses a combination of modern UV filters including **Tinosorb S, Uvasorb HEB and MBBT**, together with **zinc oxide**, while avoiding alcohol and fragrance according to the currently published ingredient list.

BEST FOR

- **Oily skin**
- **Acne-prone skin**
- Combination skin
- Normal-to-oily skin
- People who dislike heavy sunscreens
- Customers wanting **PA++++**

MAY NOT BE THE FIRST CHOICE FOR

- Very dry skin
- Very dehydrated/barrier-compromised skin
- Customers specifically looking for a **tinted sunscreen**
- Customers wanting a strongly moisturising sunscreen

SUN PROTECTION

SPF 50+ / PA++++

The filter combination is one of the strongest aspects of this product:

- **Tinosorb S (Bemotrizinol)** – broad-spectrum UVA/UVB protection
- **Diethylhexyl Butamido Triazone** – strong UVB/UVA-II protection
- **MBBT** – broad-spectrum particulate UV filter
- **Zinc Oxide** – mineral UV filter

The published ingredient list confirms these filters.

PA++++ is an important advantage when positioning it against your Solasafe products that are currently listed as PA+++.

KEY INGREDIENTS

Ingredient	Why it matters
Tinosorb S	Broad-spectrum UV protection
Diethylhexyl Butamido Triazone	Powerful UVB protection
MBBT	Broad-spectrum UV filter
Zinc Oxide	Mineral UV protection
Phospholipids	Skin-conditioning/barrier support
Glycerin	Humectant/hydration
Tocopheryl Acetate	Vitamin E antioxidant
Polylysine	Included in the formula; don't position it as an acne treatment

TEXTURE & FINISH

Lightweight gel-cream → easy spreading → non-heavy finish

It is designed more around **comfort + oilier/acne-prone skin** than around rich moisturisation.

SKINWISE SUITABILITY

Skin Type	Suitability
 Oily	★★★★★
 Acne-prone	★★★★★
 Combination	★★★★★
 Normal	★★★★½
 Normal-to-Dry	★★★★
 Dry	★★★
 Sensitive	★★★★

PROS

- **SPF 50+**
- **PA++++**
- Excellent modern UV-filter combination
- Alcohol-free
- Fragrance-free
- Good candidate for acne-prone/oily skin
- Contains zinc oxide
- Lightweight formulation
- No need to add unnecessary “active” claims to make the product attractive

The alcohol-free and fragrance-free characteristics are supported by the published ingredient information.

THINGS TO KNOW

- Not a treatment for acne.

- Not tinted, so don't position it as a visible-light pigmentation sunscreen.
 - Dry-skin customers may prefer a more moisturising sunscreen such as **Bioderma Photoderm Crème SPF50+**.
 - Check the physical pack before publishing the exact SPF/PA claims because IPCA has multiple Acne-UV formulations and recent reformulations/products exist.
-

DERMATOLOGIST'S PICK

★ Excellent choice for oily + acne-prone skin

For your Skinwise selection, I would put **Acne-UV Gold** considerably higher than a generic sunscreen simply because it combines:

PA++++ + modern filters + fragrance-free/alcohol-free formulation + acne-prone positioning.

I would **not** claim that it treats acne; its role is primarily **photoprotection for acne-prone skin**.

SKINWISE VERDICT

4.7 / 5 ★
