

La Roche-Posay Anthelios UVMune 400 Oil Control Fluid SPF 50+

Ultra-high UVA/UVB protection with oil-control, dry-touch finish

SKINWISE QUICK TAGS

Oily Skin • Combination Skin • Normal-to-Oily Skin • Acne-Prone Skin • Daily Sunscreen

★ Why We Selected It

A lightweight sunscreen designed especially for oily and combination skin, combining very high SPF 50+ protection with **UVMune 400 ultra-long UVA protection** and an oil-control, mattifying finish.

La Roche-Posay states that the formula provides protection against ultra-long UVA wavelengths of **380–400 nm**, along with resistance to water, sweat and sand.

Best For

- ✓ Oily skin
- ✓ Combination skin
- ✓ Normal-to-oily skin
- ✓ Blemish/acne-prone skin
- ✓ People who dislike greasy sunscreens
- ✓ Hot & humid weather
- ✓ Daily outdoor exposure
- ✓ People concerned about tanning and pigmentation

⚠ May Not Be Ideal For

- Very dry or dehydrated skin
- People who are sensitive to alcohol-based sunscreen textures
- People sensitive to fragrance

Why? Alcohol denat. appears high in the ingredient list, and the formula contains fragrance.

Key Technologies & Ingredients

Mexoryl 400

Helps protect against ultra-long UVA rays in the **380–400 nm** range.

Airlicium™

Mattifying technology designed to absorb excess sebum and help control shine.

Silica + Perlite

Help create the dry-touch, less-greasy finish.

Zinc PCA

Included in the formula and commonly used in products designed for oily skin.

Glycerin

Provides a hydrating component to the formulation.

Protection

SPF 50+

Very high UVB protection

Broad-spectrum UVA + UVB

Protection across UVA and UVB wavelengths

Ultra-long UVA protection

Mexoryl 400 targets the 380–400 nm range.

Water / Sweat / Sand Resistant

Designed for enhanced resistance during outdoor exposure.

Skin Feel

Texture: Lightweight fluid
Finish: Dry-touch / mattifying
Appearance: Invisible finish
Greasy feeling: Low
White cast: Designed not to leave white marks

La Roche-Posay reports a **12-hour mattifying effect** based on a consumer test of 130 people with mixed-to-oily skin.

Skinwise Suitability Score

Skin Type	Suitability
Oily	★★★★★
Normal-to-Oily	★★★★★
Combination	★★★★★
Acne-Prone	★★★★☆
Normal	★★★★☆
Normal-to-Dry	★★★☆☆
Very Dry	★★☆☆☆
Very Sensitive	★★★☆☆

Pros

- + Excellent high-level sun protection
- + Ultra-long UVA protection
- + Excellent choice for oily/combination skin
- + Lightweight fluid texture
- + Matte/dry-touch finish
- + Water, sweat and sand resistant

- + No obvious white cast
- + Particularly suitable when greasy sunscreen is a problem

Things to Know

- May feel drying on dry skin
 - Contains alcohol denat. high in the ingredient list
 - Contains fragrance
 - Matte finish may not suit everyone
-

How to Use

Apply generously to the **face and neck in the morning**, preferably shortly before sun exposure.

Reapply regularly, especially after **sweating, swimming or towel drying**.

Skinwise Tip: Sunscreen works best when applied in a sufficient amount and reapplied according to sun exposure.

Dermatologist's Pick

Recommended for:

Oily → Combination → Normal-to-Oily skin

Especially when:

You want **very high UVA/UVB protection** without a heavy or greasy sunscreen feel.

Not our first choice when:

The skin is **very dry, irritated or highly sensitive to alcohol/fragrance**.

★ SKINWISE VERDICT

4.5 / 5

Best feature:

 **High UVA protection + excellent oil-control texture**

Skinwise Category:

SUNSCREEN → OILY / COMBINATION SKIN

One-line recommendation:

A premium high-protection sunscreen for oily and combination skin that wants strong UVA protection with a lightweight, matte finish.
